

# KYRKEKVARN - TIDAN

The river Tidan passes at Kyrkekvärn. The river contains several places, where you'll pass old waterpowerplantstations, where it is necessary to transport the canoe on land (wheels is necessary). Paddle in the direction with the river towards Tidaholm, Tibro and its outflow in Mariestad (Vänern). Distance Kyrkekvärn-Mariestad is approximately 160 km long and takes about 6-7 days to paddle, if you are canoeing the whole distance.

There are several prepared camps along the trail, free of use for the guests at Kyrkekvärn, which must be used. There you find space for your tent, fire/bbc-places, toilets (no water) and woods (unfelled). If you canoeing more than a day (over night) on river Tidan, it is most times necessary with a transport, which has to be agreed before you leave.
